

# Cholesterol Content of Foods

## What is Cholesterol?

Our bodies produce cholesterol, a waxy substance needed to form cell membranes and hormones. We also get cholesterol from the foods we eat. Cholesterol is found in all animal products. Fruits, vegetables, grains and all other plant foods do not have any cholesterol. Too much cholesterol can contribute to atherosclerosis, or clogging of the arteries.

## Daily Recommended Limits

200 mg per day if you have diabetes

<b>Dairy Products</b>				
<b>Food</b>	<b>Portion</b>	<b>Cholesterol (mg)</b>	<b>Total Fat (g)</b>	<b>Saturated Fat (g)</b>
Milk (nonfat)	1 cup	4	0	0
Milk (lowfat)	1 cup	10	3	2
Milk (whole)	1 cup	33	8	5
